PROFILE

I am a motivated ICT graduate with a Diploma in Information and Communication Technology, specializing in Applications Development. I have a strong foundation in software development, including front-end and back-end web technologies, database management, and system design.

I am passionate about building functional and user-friendly applications and enjoy solving problems through code. Through academic projects, I have developed web-based systems using HTML, CSS, JavaScript, PHP, and MySQL.

I am eager to grow my skills in a structured environment and pursue a career in software development, while continuously learning and adapting to new technologies.

EDUCATION

Sol Plaatje University

2022 - 2024

**Diploma in Information and Communication Technology (Applications Development)
(NQL Level 6)**

- Average: **70%**
- Relevant Coursework:
 - Programming
 - Software Engineering
 - Information Systems
 - Communication Networks Fundamentals (Cisco Packet Tracer)
 - Data Analysis and Visualisation
 - Professional Communication

CORE SKILLS

- Problem Solving and Analytical Thinking
- Software Development Fundamentals
- Debugging & Troubleshooting
- Technical Troubleshooting
- Team Collaboration
- Strong Communication Skills
- Time Management and Organization
- Adaptability and Continuous Learning
- Attention to Detail

TECHNICAL SKILLS

- **Programming & Web:** HTML, CSS, Java, PHP, JavaScript(Basic)

- **Databases:** MySQL, SQL
- **Systems & Networking:** Computer Systems Installation and Configuration, Networking Fundamentals, Cisco Packet Tracer
- **Development Tools:** Microsoft Office (Excel, Word, PowerPoint, Teams), Visual Studio Code, Netbeans, XAMPP

PROJECTS

Funeral Parlor Management System (Academic Team Project)

- Developed responsive user interfaces using HTML, CSS, and JavaScript
- Implemented form validation to improve data accuracy
- Built backend functionality using PHP
- Designed and managed a relational database using MySQL
- Participated in system testing, debugging, and improvements
- Applied structured development steps similar to the Software Development Lifecycle (SDLC)

Technologies Used:

HTML, CSS, JavaScript (basic), PHP, MySQL

Employee Clock-In / Clock-Out System (Individual Project)

- Developed a secure login and authentication system
- Implemented validation logic to prevent multiple clock-ins without clock-out
- Automated calculation of working hours and attendance tracking
- Designed an admin dashboard to display reports and analytics
- Managed backend logic and database integration

Technologies Used:

HTML, CSS, JavaScript (basic), PHP, MySQL
